EDUCATION

York University, Bachelor of Design (GPA: 3.8, Summa Cum Laude)

September 2021 - April 2026

- **Key Courses:** Advanced Topics in Interaction Design, Unpacking the Interface, Publication Design, Creative Coding

SKILLS

- **Design:** UX Methodology, Design Systems, Visual Design, Interaction, Front-end Development
- **Development & Analytics:** HTML/CSS, JavaScript, Tailwind CSS, C#, Git, Google Analytics
- **Tools:** Miro, Figma, Adobe Suite, Procreate, Aseprite, Jira, Maze, Testflight, Unity, VS Code

EXPERIENCE

Product Manager, Radiate (2026 YorkU Graduate Show), Toronto, ON

September 2025 - Present

- Directed the product roadmap and sprint cycle for an **8-person** cross-functional team, keeping every milestone on schedule through weekly syncs.
- Boosted site traffic to **3,000+ monthly visitors** and strengthened user retention by leading usability research with 12 participants to resolve navigation barriers for students' projects and the event venue.
- Pushed for a **3-week-earlier** launch against team consensus, justifying the decision with a competitor timeline benchmark to maximize SEO indexing and employer visibility ahead of peer sites.

User Experience Intern, Genesys Cloud, Toronto, ON

May - August 2025

- Designed Move Breaks, one of the most requested features, balancing capacity/forecasting limits, timeslot-based selection, real-time schedule visibility, and configurable manager approval.
- Synthesized usability data across Maze and Dovetail, using Dovetail's AI analysis to surface missed behaviour patterns, uncovering insights that shaped Move Breaks' **3 core design priorities**.
- Reshaped Product Leadership's roadmap thinking on scheduling features by benchmarking **9 competitor systems** and mapping user mental models, delivering **5 strategic UI recommendations** that sparked substantive discussion.

UX/UI Intern, Goodself, Remote

September 2024 - May 2025

- Redesigned navigation into a responsive system aligned with social media mental models, dramatically improving discoverability, earning investor praise, and shipped in under **3 weeks**.
- Fixed illegible and inconsistent text (fonts as small as 6.89px) by consolidating **50+ inconsistent styles** on mobile into a clean **8-step typography scale** built around WCAG 2.1 AA readability standards.
- Defined and pitched a multi-phase roadmap for a medical tracker's privacy, notification, and compliance features, aligning the CEO and engineering team around investor-requested work despite limited runway and no immediate payoff.

Product Design Intern, Exomis Design + Development, Remote

May - July 2024

- Facilitated design sprints across client and internal projects, producing UX/UI work such as sitemaps, user journey maps, and wireframes, along with graphic design assets including logos, mockups, pixel art and digital illustrations.
- Delivered responsive web and mobile layouts for client projects, including a medical equipment supplier website with developer-ready specifications.

AWARDS

1st Place Tie-Winner in UX Design [🔗](#) (RGD Awards '23) · **3rd Place in UX Design** [🔗](#) (Gaming Track, Protothon '24)
Honourable Mention in Augmented (AI) Creativity [🔗](#) (RGD Awards '24) · **Wall of Portfolios** [🔗](#) ('26)

PROJECTS

- **Accelerator** [🔗](#) (Unity, C#, Blender): Built and designed an interactive analog horror game transforming friction-filled CAPTCHA access flows into interactive privacy critiques.
- **Radiate Website** [🔗](#) (Webflow, JS, CSS): Custom CMS layout and site architecture for YorkU's graduate show.
- **Design Portfolio** [🔗](#) (JS, Tailwind, HTML): Custom-coded personal site optimized for accessibility and traffic tracking.
